The Institute of Data Science and Artificial Intelligence (DATAI) announces the DATAI Awards 2023-2024 for particularly relevant scientific contributions in the field of Data Science and Artificial Intelligence. The prizes recognize originality, innovation and contribution with the double objective of encouraging research work in this field as well as its projection to society.

A maximum of two prizes will be awarded in this call, each with an endowment of 3,000 euros as aid for the development of a research project. The award-winning contributions must be pioneering and influential in international research. If the prize is awarded to an application submitted by two or more members of the institute, one of them will act as the person responsible for the aid.

All the necessary documentation related to the awards will be sent in digital format to datai@unav.es from November 2, 2023 until August 31, 2024.

The awards will be announced by October 30, 2024.
