Postdoctoral Researcher

Infections and Cancer research group – UNIC II (Cancer Epidemiology Research Programme at the Catalan Institute of Oncology)

[Link to job offer](#)

Deadline: Please submit your application by 10/11/2023

About the research group

The Infections and Cancer (UNIC II) research group has long-standing expertise in the research of prevention of HPV infections and cervical cancer. It facilitates information for decision-making bodies and enables public health interventions both nationally and internationally. UNIC II is recognized for conducting high-quality research to improve the prevention of cancers associated with HPV infection.

European PartnERship to Contrast HPV (PERCH) is a European Union funded project that will involve 18 European countries. The General Objective of PERCH is to contribute to the implementation of Europe's Beating Cancer Plan, which aims to support Member States' efforts to extend the roll-out of routine HPV vaccination to eliminate cervical cancer and other cancers caused by HPV in the coming decade. PERCH starts from the analysis of the context with respect to how HPV vaccination and HPV screening are implemented and monitored in all participating countries; determinants of vaccination hesitation will then be analysed in order to increase knowledge and awareness, to target population on the benefits of the vaccine up-take; training activities will also be provided for health personnel on vaccination communication and finally before the end of the Joint Action (JA), MSs will be supported to launch large-scale human papillomavirus vaccination campaigns.

About the role

- To perform mainly the tasks of the international project management (PERCH), particularly to:
- Coordinate the participation of the UNIC II in the development of the different Work Packages (WP), in direct relation with the WP leaders of the PERCH.
- Prepare follow-up reports and deliverables according to the PERCH Project Schedule project in coordination with the researchers of the UNIC II.
- Prepare and attend PERCH online and face-to-face coordination meetings.
- Lead the statistical analysis of HPV vaccination coverage data.
- Participate in obtaining, interpreting and disseminating results of the PERCH.
- Coordinate and establish synergies between PERCH and other projects within UNIC II.

Job requirements

- Professional experience
 - Research and/or project management in international collaborative projects
 - Experience in team coordination and supervision
